Abstract— Among the five major sectors; Healthcare, Agriculture, Financial Inclusion, Public Transport and Education, automation in Healthcare is what will keep the other sectors blooming, as Human is the most important resource. Our system or website intercityhealthcare.com consists of service availability on the Internet. It provides easiest way for all the doctors, patients and others to get all the information needed as quick as possible that too from anywhere in the world. The persons new to particular city can get all the information regarding all the different hospitals, doctors in any hospital data, their available timings and data can be processed in minutes. The main use of this site is that any patient can get appointment to any doctor on any day. That is a patient doesn't need to move to particular city, hospital, doctor to get an appointment. This site also contains the administration module, which deals with inserting and deleting the information into site and modifying and updating the data.

I. DESIGN

This project comprises of many modules. Out of which we have undertaken following modules such as:

- Home
- Contact

- Home
 - Patient Login
 - Patient Signup
 - Doctor Login
 - Admin Login

- Patient Dashboard
 - My Profile
 - My Appointments
 - Book my Appointment

- Doctor Dashboard
 - My Profile
 - My Appointments

- Admin Dashboard
 - Manage Patients
 - Manage Doctors
 - Appointments
 - New Queries

IV. RESULTS

Browser Window(s) –

Home:

Contact:

Patient Login:

The screenshot shows a web browser window with the URL `localhost/hospital/hms/user-login.php`. The page title is "HMS | Patient Login". It features a login form with the following elements:

- A heading "Sign in to your account".
- A prompt "Please enter your name and password to log in".
- An email input field containing "abc.xyz@gmail.com".
- A password input field with masked characters "*****".
- A link "Forgot Password?".
- A blue "Login" button.
- A link "Don't have an account yet? Create an account".
- A footer "© 2019 HMS. All rights reserved".

The browser's taskbar at the bottom shows several open applications: XAMPP Control Panel, User-Login - Google..., Hospital Management..., and contact.php - Visual S... The system clock indicates 10:29 PM.

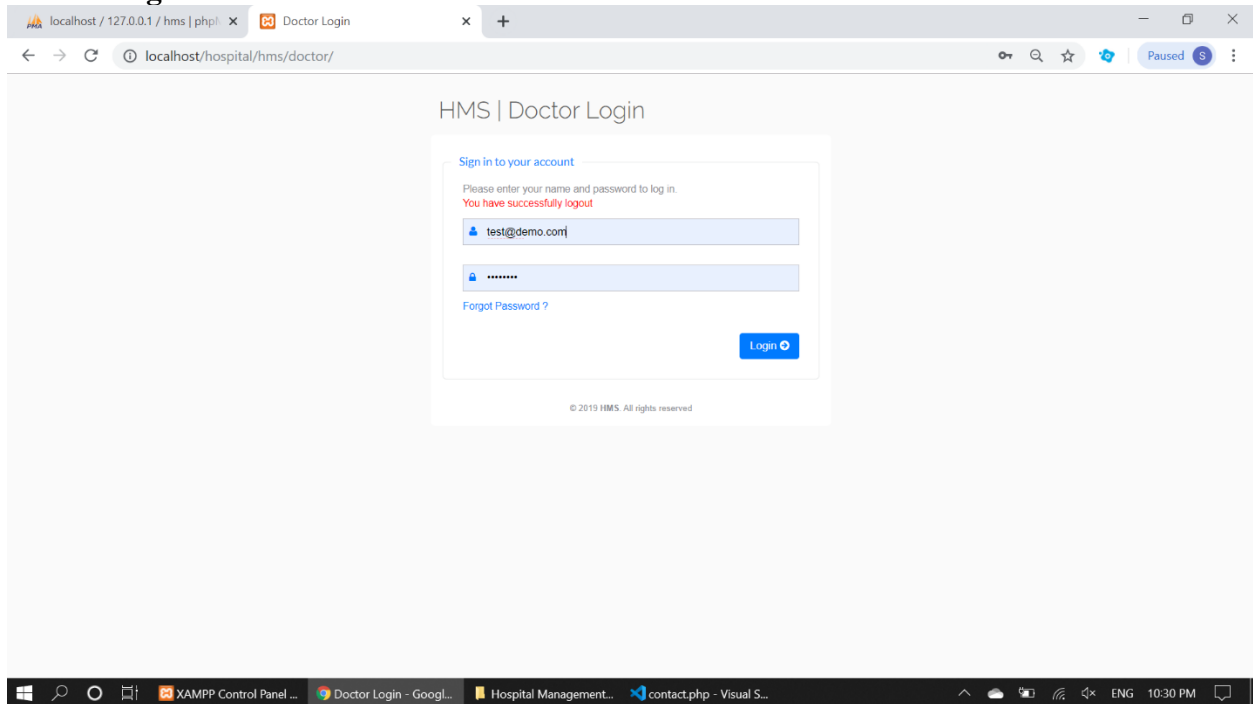

Patient Dashboard:

The screenshot shows a web browser window with the URL `localhost/hospital/hms/dashboard.php`. The page title is "Hospital Management System". The dashboard is titled "USER | DASHBOARD" and includes a user profile "jack Peter" with a dropdown arrow. The main content area contains three large cards:

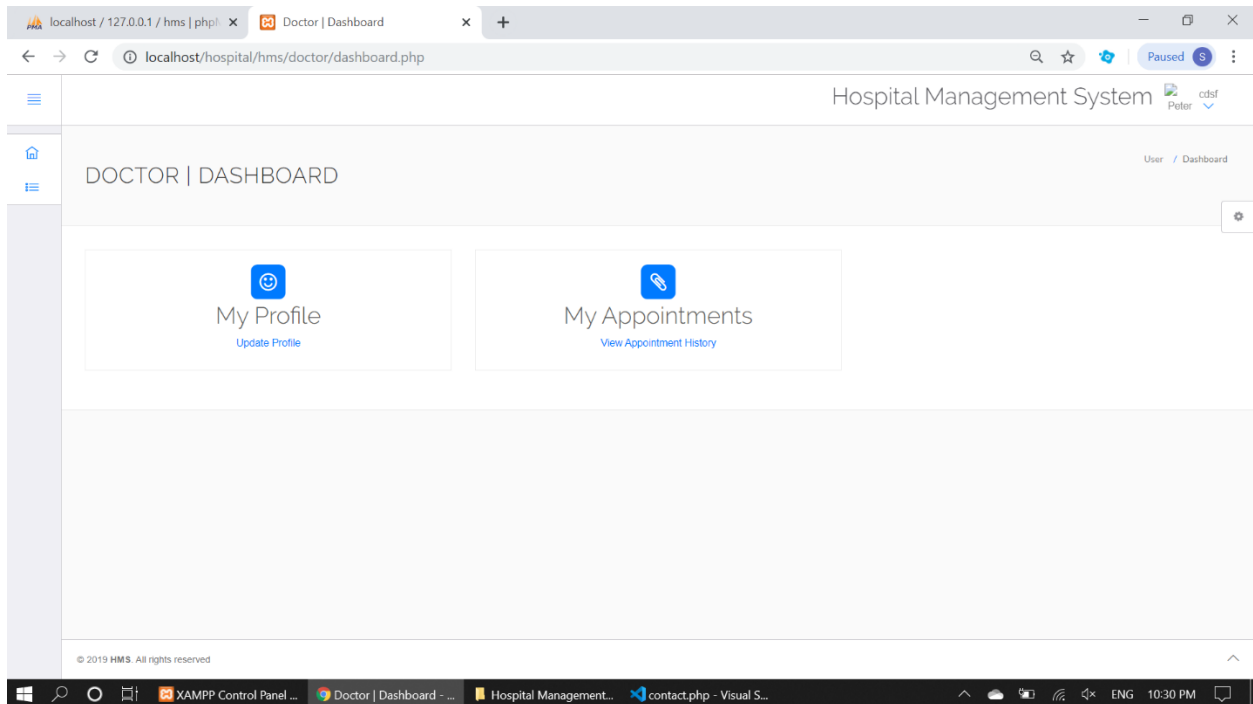

- My Profile**: Includes an "Update Profile" link.
- My Appointments**: Includes a "View Appointment History" link.
- Book My Appointment**: Includes a "Book Appointment" link.

The footer of the dashboard displays "© 2019 HMS. All rights reserved". The browser's taskbar at the bottom shows the same set of applications as the previous screenshot, with the system clock now at 10:30 PM.

V. CONCLUSION

Taking into account all the mentioned details, we can make the conclusion that the hospital management system is the inevitable part of the lifecycle of the modern medical institution. It automates numerous daily operations and enables smooth interactions of the users. Developing the hospital system software is a great opportunity to create the distinct, efficient and fast delivering healthcare model. Implementation of hospital management system project helps to store all the kinds of records, provide coordination and user communication, implement policies, improve day-to-day operations, arrange the supply chain, manage financial and human resources, and market hospital services. This beneficial decision covers the needs of the patients, staff and hospital authorities and simplifies their interactions. It has become the usual approach to manage the hospital. Many clinics have already experienced its advantages and continue developing new hospital management system project. It is all about the modernizing a hospital through use of technology. Computers helps in it and take over the manual system for quick and easy functioning. This hospital management system is a quite the reliable and is proven on many stages. All the basic requirements of the hospital are provided in the hospital in order to manage it perfectly and large amount of data can also be stored. It gives many facilities like searching for the detail of patient, billing facilities as well as the creation of test reports. So, it is an important system for modern days.

Thus, Hospital Management System which intern provide healthcare management is successfully created.
